This listing of claims will replace all prior versions and listings of claims in the application:

Listing of Claims:

1. (Currently Amended) A protease conjugate comprising a protease moiety and one or more addition moieties wherein the protease moiety comprises a first epitope region, a second epitope region, and a third epitope region, wherein each addition moiety is covalently attached to an epitope protection position of the protease moiety, wherein:
 - (a) the epitope protection positions for the first epitope region are selected from the group of positions corresponding to positions consisting of ~~1, 2, 3, 4, 5, 6, 7, 12, 17, 36, 40, 41, 43, 44, 45, 67, 86, 87, and 89, 206, 209, 210, 212, 213, 214, 215, and 216~~ of the amino acid sequence of subtilisin BPN' set forth in SEQ ID NO:1;
 - (b) the epitope protection positions for the second epitope region are selected from the group of positions corresponding to positions consisting of ~~25, 26, 27, 46, 47, 48, 49, 50, 51, 52, 53, 54, 91, 99, 100, 101, 102, 127, 128, 129, 130, 131, 132, 133, and 134, 136, 137, 138, 140, 141, 144, and 145~~ of the amino acid sequence of subtilisin BPN' set forth in SEQ ID NO:1; and
 - (c) the epitope protection positions for the third epitope region are selected from the group of positions corresponding to positions consisting of ~~9, 10, 22, 23, 24, 62, 63, 143, 146, 154, 155, 156, 157, 172, 173, 187, 189, 195, 197, 203, 204, 253, 254, 256, and 265, 267, 269, 271, 272, and 275~~ of the amino acid sequence of subtilisin BPN' set forth in SEQ ID NO:1.
2. (Original) A protease conjugate according to Claim 1 wherein each addition moiety, independently, has the structure:

wherein X is selected from the group consisting of nil and a linking moiety; R₁ is selected from the group consisting of nil, a first polypeptide, and a first polymer; and R₂ is selected from the group consisting of nil, a second polypeptide, and a second polymer; wherein at least one of X, R₁, and R₂ is not nil.

3. (Original) A protease conjugate according to Claim 2 wherein the protease moiety has a modified amino acid sequence of a parent amino acid sequence, wherein the modified amino acid sequence comprises a substitution by a substituting amino acid at one or more of the epitope protection

- positions and wherein each addition moiety is covalently attached to one of the substituting amino acids.
4. (Original) A protease conjugate according to Claim 3 wherein the substituting amino acid is cysteine.
 5. (Previously Presented) A protease conjugate according to Claim 4 wherein the parent amino acid sequence is selected from the group consisting of subtilisin BPN', subtilisin Carlsberg, subtilisin DY, subtilisin 309, proteinase K, thermitase, Protease A, Protease B, Protease C, and Protease D.
 6. (Previously Presented) A protease conjugate according to Claim 5 wherein:
 - (a) the epitope protection positions for the first epitope region are selected from the group consisting of 17 and 89;
 - (b) the epitope protection positions for the second epitope region are selected from the group consisting of 52 and 134; and
 - (c) the epitope protection positions for the third epitope region are selected from the group consisting of 155 and 265.
 7. (Previously Presented) A protease conjugate according to Claim 6 wherein the epitope protection positions for the first epitope region are selected from the group consisting of 17 and 89.
 8. (Original) A protease conjugate according to Claim 6 wherein R_2 is nil.
 9. (Original) A protease conjugate according to Claim 8 wherein R_1 is nil.
 10. (Original) A protease conjugate according to Claim 8 wherein R_1 is the first polypeptide.
 11. (Previously Presented) A protease conjugate according to Claim 10 wherein the first polypeptide is selected from the group consisting of subtilisin BPN', subtilisin Carlsberg, subtilisin DY, subtilisin 309, proteinase K, thermitase, Protease A, Protease B, Protease C, and Protease D.
 12. (Previously Presented) A protease conjugate according to Claim 11 wherein the first polypeptide is covalently attached to the linking moiety or the protease moiety at a position of the first polypeptide selected from the group consisting of 1, 2, 3, 4, 5, 6, 7, 9, 10, 12, 17, 22, 23, 24, 25, 26, 27, 36, 40, 41,

- 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 62, 63, 67, 86, 87, 89, 91, 99, 100, 101, 102, 127, 128, 129, 130, 131, 132, 133, 134, 136, 137, 138, 140, 141, 143, 144, 145, 146, 154, 155, 156, 157, 172, 173, 187, 189, 195, 197, 203, 204, 206, 209, 210, 212, 213, 214, 215, 216 253, 254, 256, 265, 267, 269, 271, 272, and 275.
13. (Original) A protease conjugate according to Claim 12 wherein X is nil and wherein the protease moiety and the first polypeptide are covalently attached through a disulfide bridge.
14. (Original) A protease conjugate according to Claim 6 wherein R_1 is the first polymer and R_2 is selected from the group consisting of nil and the second polymer.
15. (Original) A protease conjugate according to Claim 14 wherein R_2 is nil and the first polymer is a polyethylene glycol.
16. (Original) A protease conjugate according to Claim 15 wherein at least one addition moiety is covalently attached to an epitope protection position for the first epitope region.
17. (Original) A protease conjugate according to Claim 15 wherein at least one addition moiety is covalently attached to an epitope protection position for the second epitope region.
18. (Original) A protease conjugate according to Claim 15 wherein at least one addition moiety is covalently attached to an epitope protection position for the third epitope region.
19. (Previously Presented) A protease conjugate according to Claim 1 additionally comprising one or more supplementary moieties selected from the group consisting of small molecules, polypeptides, and polymers.
20. (Original) A cleaning composition comprising a protease conjugate according to Claim 1 and a cleaning composition carrier.
21. (Original) A personal care composition comprising a protease conjugate according to Claim 1 and a personal care carrier.
